

I, as a young person living in a world where nicotine/smoking products are being targeted towards myself, I am angry. Angry because profit is more important than the youth's health. It is crucial that we ban smoking from apartments complexes because exposing young people to this addiction will harm them, others, and the planet. It is our responsibility that we do not kill future generations with today's tobacco products. We must grant everyone the right to fresh, clean air and the first step is to ban smoking in apartments.
